Special Installation Notes

Pattern: Stone should be installed in a horizontal ashlar pattern. Do not install stones vertically. Blend the stone on the wall from several different boxes to ensure proper color and size variation.

See catalog photos for recommended installation pattern.

Chalk Lines: Should be used by installer to ensure a straight and level pattern.

Vertical Joints: Avoid exceeding 2 medium or 3 small stones in height.

Horizontal Joints: Avoid exceeding 6' to 8' in length.

Sealing: Not required. However, if installed on an exterior exposed to excessive water from runoff or improper drainage, we suggest the product be sealed in that particular area to protect it from staining or spalling during freeze-thaw cycles.

Freeze-Thaw: When installing stone in a freeze-thaw environment, extra care should be taken to ensure a full coverage of mortar on the back of each stone, which will prevent water pooling behind the stone after it's been installed.

Drystacked: A polymer modified mortar should be used for all drystacked applications.

Installation Info: Download Coronado's latest installation instructions at www.coronado.com for information on mortar and installation recommendations.

Profile Properties

Size: Stone sizes range from 2" to 8" in height and up to 23" in length (nominal).

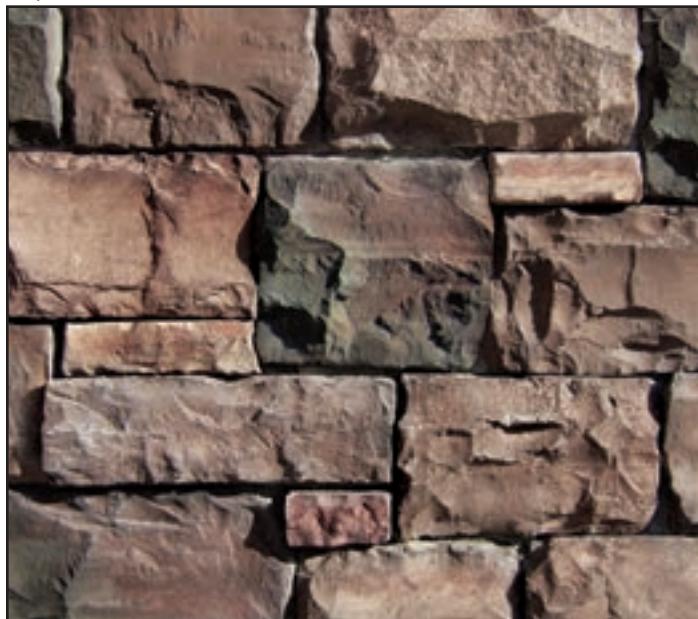

Thickness: 1" to $2\frac{1}{2}$ ".

Weight: 7 to 10 lbs. per square foot.

Packaging: Available in big boxes (110 sq ft Flats & 110 lft Corners) or Dura-Paks (15 sq ft Flats & 13.5 lft Corners).

When purchasing Country Rubble, coverage is based on installation with a $\frac{1}{2}$ " joint at the back of the stone.
