Special Installation Notes

- Pattern:** Stone should be installed in a horizontal ashlar pattern. Do not install stones vertically. Blend the stone on the wall from several different boxes to ensure proper color and size variation.
See catalog photos for recommended installation pattern.
- Chalk Lines:** Should be used by installer to ensure a straight and level pattern.
- Vertical Joints:** Avoid exceeding 2 medium or 3 small stones in height.
- Horizontal Joints:** Avoid exceeding 6' to 8' in length.
- Sealing:** Not required. However, if installed on an exterior exposed to excessive water from runoff or improper drainage, we suggest the product be sealed in that particular area to protect it from staining or spalling during freeze-thaw cycles.
- Freeze-Thaw:** When installing stone in a freeze-thaw environment, extra care should be taken to ensure a full coverage of mortar on the back of each stone, which will prevent water pooling behind the stone after it has been installed.
- Installation Info:** Download Coronado's latest installation instructions at www.coronado.com for information on mortar and installation recommendations.
